

23 November 1954

MEMO FOR THE RECORD OF THE CLARK COMMITTEE

1. Principal questions for the day in ORR surrounded:
 - a. Duplication of effort; if and where it existed, within and without the Agency
 - b. Authority for missions and tasks undertaken; who
ORR, as an example
 - c. Personnel competency and capabilities
 - d. Colonel Miller is making a very definite effort to pull the various responsibilities of the offices visited into focus, and determine in his own mind what function compliments another, and how they mesh into a functional necessity.
2. One of Colonel Miller's new points of interest is determination of source reliability by the collector, and evaluation of information received, especially insofar as determining reliability. Colonel Miller is of the opinion that in our mission, it is practically impossible to believe anything that is told us.
3. Colonel Miller left before lunch to attend a staff meeting, and McGruder took over for the first time insofar as questioning was concerned. On the subject of NIS, his interests were far more substantive than those evidenced by the Colonel. These centered principally on the collection, and integration and formulation of surveys, and their value and use to consumers, priorities of projects, logic of choice.
